

TYPE 90 PELLETS

Cylindrical pellets produced from dried, milled and pressed leaf hops.

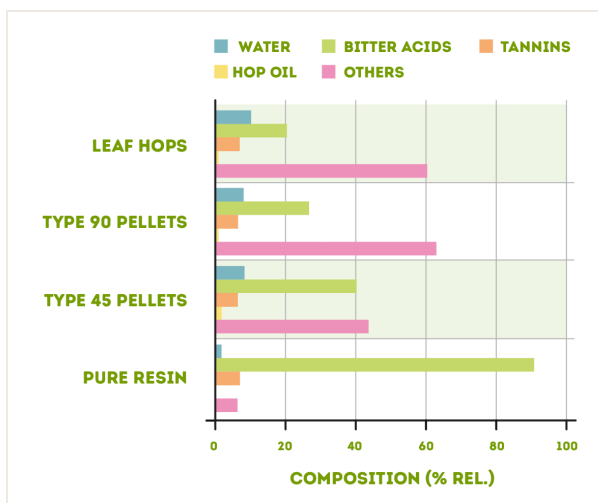

OVERVIEW

- **Type 90 Pellets** are a hop product added to the wort kettle during the boiling process. Depending on the time of the addition, these pellets contribute to the desired bitterness as well as to the characteristic hop aroma of beer.
- **Type 90 Pellets** are also suitable for use the brewing process. They impart a on the cold side (dry hopping) of pronounced hop aroma to beer.
- **Type 90 Pellets** have a composition very similar to that of leaf hops, but deliver higher yields, more consistent quality and improved storage stability. The costs for storage and transportation are also lower.

PROPERTIES	
APPEARANCE	Olive green pellets, approx 6mm x 10 – 15mm in size (diameter x length).
UTILISATION	<p>Given as an early kettle addition (up to 15min after the boil begins), hop utilization normally falls within a range of 30 – 35%.</p> <p>When Type 90 Pellets are added late in the boil, utilization can decline to 20% or less, depending on individual process conditions. Both additions can vary depending on the desired intensity and the beer style.</p>
FLAVOUR	Type 90 Pellets produce flavors in beer indistinguishable from those of leaf hops. They provide bitterness and aroma to the beer. The flavor depends on the variety, quantity and time of addition.
QUALITY	All Ellerslie Australia products are processed in facilities which fulfill internationally recognized quality standards.
PACKAGING	Type 90 Pellets are packaged in metallized five-layer foil bags which are then packed in boxes. These are available as 'soft' packs flushed with inert gas (N ₂ and/or CO ₂) at atmospheric pressure. Pack sizes range from 2.3kg (5lb) to 150kg (330lb).

QUICK SPECS	
DESCRIPTION	Cylindrical pellets produced from dried, milled and pressed leaf hops
COLOUR	Olive green
ALPHA ACIDS	1 – 25%
BETA ACIDS	1 – 14%
HOP OILS	0.2 – 4.0ml/100g
MOISTURE CONTENT	7 – 9%

TYPE 90 PELLETS

Cylindrical pellets produced from dried, milled and pressed leaf hops.

PRODUCT USE

DOSAGE	<p>The quantity of Type 90 Pellets in addition can be calculated using the alpha acid content of the pellets and an estimated or known utilization.</p> <p>Late kettle additions of Type 90 Pellets (Typically 5 – 20 min prior to the end of the boil) reduce alpha acid utilization but increase hop aroma and flavor.</p>
ADDITION	<p>Type 90 Pellets can be added directly to the wort kettle or hop dosing vessel. Alternatively, owing to their free-flowing nature, additions of Type 90 Pellets can be automated.</p> <p>Dry hopping normally involves the addition of Type 90 Pellets during secondary fermentation or maturation using various techniques.</p>
STORAGE	<p>Type 90 Pellets should be stored at low temperatures (< 5°C or < 41°F). Pellets in opened foil packs should be used quickly to avoid deterioration of the bitter acids and essential oils.</p>
BEST BEFORE DATE	<p>Type 90 Pellets are stable for five years from the date they were produced / packaged if stored under the recommended conditions.</p>
SAFETY	<p>When handling this product, it is advisable to wear a dust mask. Hop pellets are combustible.</p>

ANALYTICAL METHODS

CONCENTRATION OF BITTER SUBSTANCES	<p>Alpha and beta acids can be measured using the following methods:</p> <ul style="list-style-type: none">• HPLC according to Analytica-EBC 7.7 or ASBC Hops-14 with the current ICE standard• spectrophotometric method according to ASBC Hops-6A <p>The lead conductance value can be measured using the following methods:</p> <ul style="list-style-type: none">• Analytica-EBC 7.4 or 7.5• ASBC Hops-6B
CONCENTRATIONS OF HOP OIL	<p>The hop oil concentration can be measured using the following methods:</p> <ul style="list-style-type: none">• Analytica-EBC 7.10• ASBC Hops-13

TECHNICAL SUPPORT

We are pleased to offer assistance and advice on the full range of Ellerslie Australia products:

- Copies of all procedures relevant analytical procedures
- Safety Data Sheets (SDS)
- Assistance with pilot or full-scale brewing trials
- Special analytical services
